Firecontrol

Install our Sawo Dragonfire heater control unit anywhere you want in your space and place. Then set the options for timing, heat, steam, and so on and so on, anyway you desire... I think this “computer chip unit” represents such amazing technology that I definitely wanted to give it good looks! Install it proudly so everybody finds it easily for choosing the preferred level of heat. Firecontrol...

Firemeter

How hot is your sauna right now? Well, to be honest: Who cares? If it's too cold, then it's too cold, and if it's too hot, then it's too hot... But lot's of people - including myself - still want to be aware of the facts. Therefore we made our "heat information meter" a most comprehensive graphic device to show the level of your fire. Both in Celsius and in Fahrenheit. Firemeter....

STEAMSHOT

Steamshot

Self-standing stainless steel ladle with western red cedar handle

Product Specs:

ISOMETRIC VIEW

FRONT VIEW

SIDE VIEW

Steamshot

It's amazing, the experience when you grab the ladle, throwing water at the heater... The sizzling sound, as well as the humid heat surrounding you as a warming hug. This phenomena alone makes a sauna visit a truly magic experience. My Dragonfire ladle you don't have to search for around your feet: "Steamshot" stands up on its own, ready to grab. Throw away...

Steamwater

A bucket of water is a bucket of water. Or is it? I wanted to improve this ancient object at least a little bit. Easier to grab, easier to carry... And it's got my "Junglefire" pattern engraved all over the cedar tree surface by state-of-the-art laser technology. A bucket of steam to shoot your fire down.
